

EG4[®] WALLMOUNT INDOOR 280Ah LITHIUM BATTERY

In the search to beat rising energy costs, EG4 believes in both building and designing better batteries for all consumers. More than just power sources, these batteries are the bedrock of a sustainable energy solution. With advanced features, such as an intelligent Battery Management System (BMS), robust safety measures, closed-loop communications, and seamless integration with leading inverters, EG4 lithium battery solutions provide a dependable and future-proof solution for a wide range of energy storage needs. EG4 batteries are designed to meet the diverse requirements of residential and commercial applications.

RELIABLE POWER, ANYTIME, ANYWHERE:

Worry no more about power outages! For customers seeking a solution to battery installations in very cold conditions, look no further than the WallMount series. The EG4 WallMount comes as either an indoor or outdoor model that ensures consistent power delivery, in spite of the cold. With integrated self-heating features, the WallMount batteries perform optimally even in colder climates. Engineered for safety and compliance, each WallMount battery features a comprehensive list of code-compliant features and a lifespan designed to last an impressive 10 years.

ULTIMATE ENERGY STORAGE:

Optimize energy usage and ensure a constant and reliable power supply with EG4 lithium battery solutions. EG4 batteries are designed with ease of use and longevity in mind. EG4 incorporates an industry-leading Battery Management System (BMS) which ensures reliability, efficiency, and safety, giving customers peace of mind and a quality product.

VERSATILE APPLICATIONS:

From low-voltage residential indoor/outdoor energy storage systems to code-compliant commercial installations, EG4 lithium battery solutions are tailored to meet diverse energy storage needs. With parallel connectivity options, systems can scale up and grow with rising energy demands while maintaining BMS communications. Start small and grow or jump right into a large-scale system; EG4 offers the incremental freedom to design a system tailored to individual needs.

ADVANCED BATTERY MANAGEMENT:

Monitor and control the batteries with ease using the on-board LCD touch screen. Compatible with a wide range of inverters, EG4 batteries offer seamless integration through closed-loop communication. Enhanced safety features including dual onboard fire arrestors and emergency shutdown functionality ensure fail-safe operation in any environment.
