

## MACOS BMS Tools Security bypass guide for MACOS

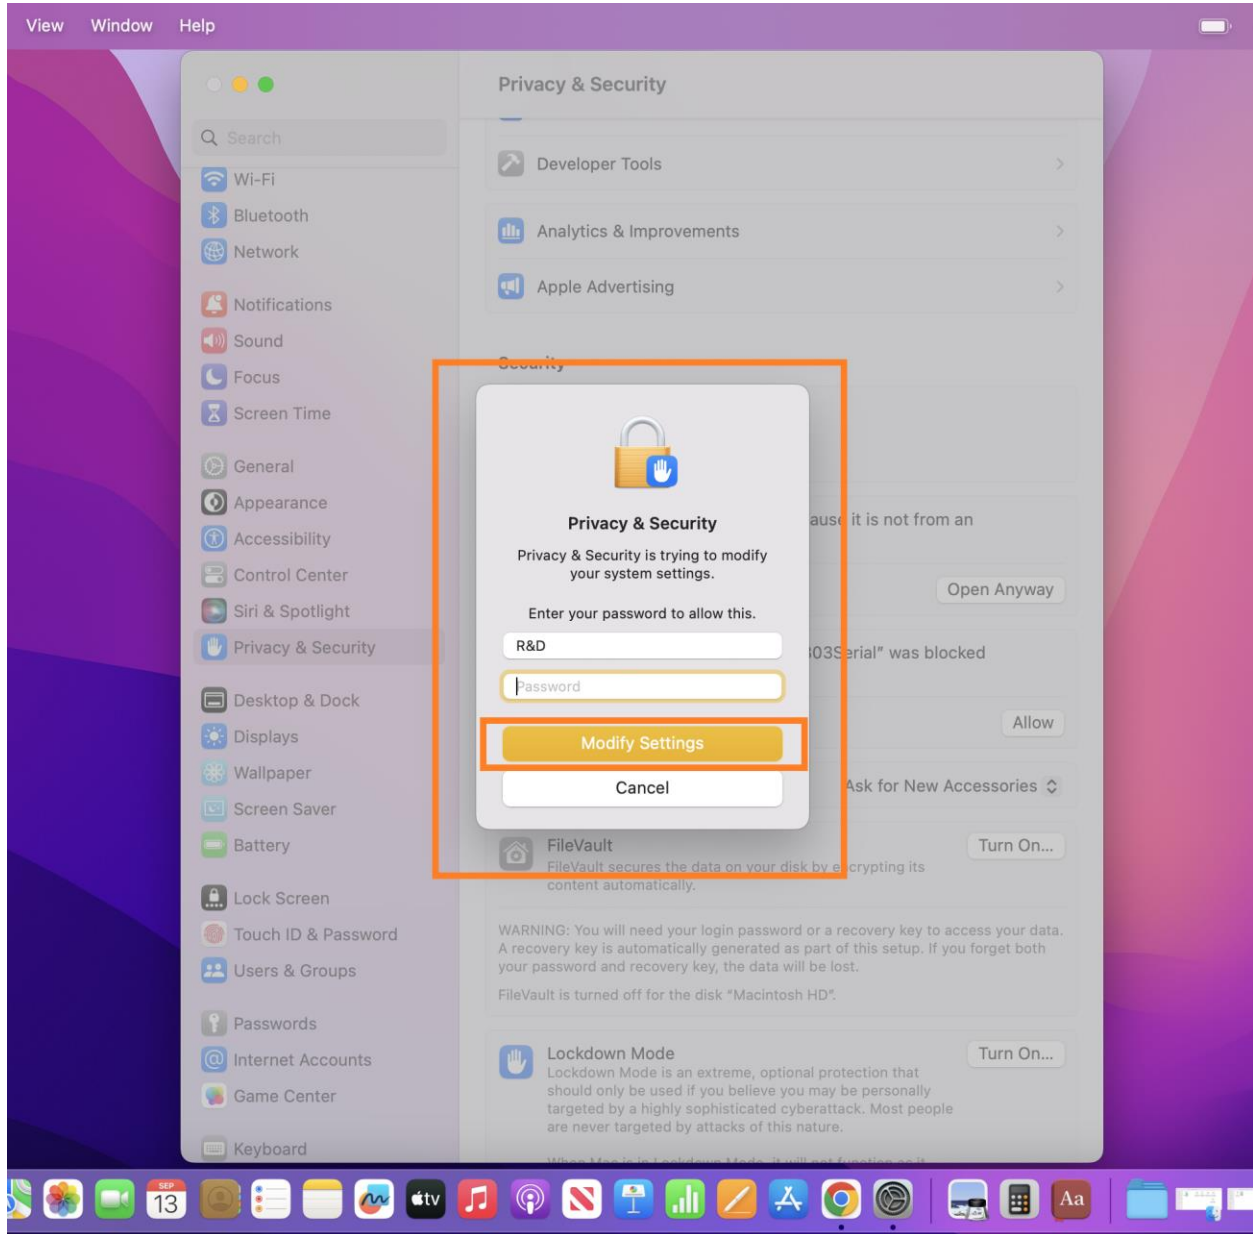

1. Some versions of MACOS will not allow 3rd party programs to be used. To bypass this issue please follow this guide.
2. After extracting the BMS Tools folder, Whenever opening the BMS Tools program for the first time. This security popup could be displayed. Click OK. This warning will now disappear.

3. Navigate to the Privacy & Security tab in the System settings.
4. Confirm that the Allow applications downloaded from is chosen as “App Store and Identified developers”
5. Under Privacy & Security begin to scroll down until you see under Security, “BMS\_Test” was blocked from use because it is not from an identified developer.” Click Open Anyway.

6. A window will now appear asking you to input your Password. Input your password then click Modify Settings

7. This security box will now re-open. Click Open to open the BMS Test program. The BMS Tools is now unblocked, and you can access the program.
