

To whom it may concern,

This letter is to certify that the following EG4 inverters have been programmed to derate the unit's output to a specified value.

This value is set, monitored, and controlled by EG4, with the installer and end-user unable to make changes both remotely and locally once set. The derating value is password protected and neither the installer nor the end-user will have knowledge of the password.

Changes to this setting will only be accomplished through authorization in writing from the jurisdiction requiring this change [utility or the permitting Authority Having Jurisdiction (AHJ)].

Any other requests should be made to the program administrator - see contact information below.

Inverter Model #	Inverter SN (Serial #)	Derate To (kW)
