

Grid Sell-Back Limitation Program

To Whom It May Concern,

This letter is to certify that the following EG4 Electronics inverters have been programmed to: Limit the total Grid-Sell output to the specified value; Confirm that Export is in place; or, Request to modify or remove Limited Export.

The Grid-Sell output setting is updated, monitored, and controlled by EG4 Electronics with the installer and end-user unable to change this value, locally or remotely, once it is set. To accomplish this, the installer or end-user contacts EG4 Electronics Support, the Support Team Member sets the limit and then password protects the setting. Neither the installer nor the end-user will have knowledge of the password.

Changes to these settings will only be made upon authorization in writing from the jurisdiction requiring this setting - either the utility or the Authority Having Jurisdiction (AHJ).

Requests to modify or remove the setting locks shall be made by completing the information below. If the request is for Limited Export or Request to modify Limited Export, please complete and submit Attachment "A" once the installation is complete.

Any other requests should be made to Support@eg4electronics.com
