

Subject: Explanation of DC ESS Model Numbers for the EG4 WallMount 314Ah Indoor Battery

To Whom It May Concern,

This letter is to clarify the DC Energy Storage System (ESS) model numbers listed on the UL 9540 Certificate of Compliance for the EG4 WallMount 314Ah Indoor Battery.

The UL 9540 Certificate of Compliance lists the following DC ESS model series covered under the Intertek Certification Report 250820059GZU-001:

- WM-48-314-1-IN-
- WM-48-314-2-IN-
- WM-48-314-3-IN-
- WM-48-314-4-IN-
- WM-48-314-5-IN-
- WM-48-314-6-IN-

Each model may be followed by a two-digit suffix from 00 through 99.

The ESS model series corresponds to combinations of the EG4 WallMount 314Ah Indoor Battery, commonly identified by the base battery model number:

WM48314IN or WM-48-314-IN-, may be followed by 00-99.

The numerical digit appearing between the "314" and "IN" portions of the ESS model number on the UL 9540 Certificate (1 through 6) designates the number of WallMount 314Ah Indoor battery units evaluated as part of a certified UL 9540 Energy Storage System configuration. These identifiers do not represent different battery constructions, cell chemistry, safety features, or electrical ratings. Rather, they distinguish the certified ESS configurations based on the quantity of identical batteries included in the evaluated system.

For example:

- WM-48-314-1-IN- represents a UL 9540 ESS configuration utilizing one WallMount 314Ah Indoor battery.
- WM-48-314-2-IN- represents a UL 9540 ESS configuration utilizing two WallMount 314Ah Indoor batteries.
- WM-48-314-3-IN- represents a UL 9540 ESS configuration utilizing three WallMount 314Ah Indoor batteries.

- WM-48-314-4-IN- represents a UL 9540 ESS configuration utilizing four WallMount 314Ah Indoor batteries.
- WM-48-314-5-IN- represents a UL 9540 ESS configuration utilizing five WallMount 314Ah Indoor batteries.
- WM-48-314-6-IN- represents a UL 9540 ESS configuration utilizing six WallMount 314Ah Indoor batteries.

The optional suffix "00" through "99" is used for manufacturing, production, or traceability purposes and does not affect the battery's certification status or compliance with the certified UL 9540 system configuration.

Accordingly, batteries labeled as WM48314IN are the same certified battery product referenced by the UL 9540 Certificate of Compliance.

Should you require any additional information regarding the certification, model nomenclature, or approved system configurations, please contact EG4 Support at support@eg4electronics.com or by calling 1-903-609-1988.

Sincerely,

EG4 Compliance Support
